

# PokeValue - Pricing Model Factor Report

Generated 2026-07-24

## How the model works

Every card's fair value is computed as: **base rate x Pokemon factor x rarity factor x illustrator factor x set factor x card type factor**. Each factor is independent of the others - a Pokemon's factor doesn't depend on which rarity the card happens to be, and vice versa. This is a log-linear (ridge) regression fitted on 19,436 English-language cards with a real Cardmarket price, covering every set on TCGdex.

**Model accuracy** (on 2,916 cards held out of training): R-squared = 0.877 (the model explains 88% of the price variation between cards), median prediction error 40%. This is comparable to a neural-network version of the same model tried earlier, but every number below is directly interpretable instead of hidden inside the network.

## How to read the confidence columns

**n cards** is how many priced cards support that specific factor. **95% CI** is a bootstrap confidence interval (60 resamples) - the range the true factor plausibly falls in; a wide range means the point estimate is shaky. Anything with fewer than 5 supporting cards is flagged **low confidence** - on the live site, those factors are additionally pulled most of the way back toward neutral (1x) so a single freak card can't dominate a shown price. The numbers in this report are the raw, undamped statistical estimate.

**Not included in this model:** reverse holo / 1st Edition / Shadowless pricing (Cardmarket's variant-level data was too inconsistent to trust yet) and manual artwork-quality ratings (descope for this version). Condition and language remain adjustable on the site but are reasonable assumptions, not computed from data - Cardmarket doesn't track prices separately by grade or by language.

## Rarity factors

30 distinct rarities.

| Value                     | Factor | n cards | 95% CI      | Flag           |
|---------------------------|--------|---------|-------------|----------------|
| Black White Rare          | x54.78 | 4       | 10.44-99.13 | low confidence |
| Mega Hyper Rare           | x22.57 | 8       | 10.08-35.76 |                |
| Special illustration rare | x16.96 | 222     | 14.94-19.68 |                |
| Illustration rare         | x7.87  | 493     | 7.36-8.65   |                |
| Hyper rare                | x4.39  | 69      | 3.62-4.96   |                |
| Shiny rare                | x4.23  | 224     | 3.92-4.85   |                |
| Secret Rare               | x3.26  | 582     | 2.97-3.65   |                |
| Amazing Rare              | x2.81  | 9       | 2.25-3.28   |                |
| Shiny rare VMAX           | x2.38  | 7       | 1.52-3.81   |                |
| Rare Holo LV.X            | x1.97  | 43      | 1.47-2.64   |                |
| Ultra Rare                | x1.46  | 1406    | 1.36-1.64   |                |
| Shiny rare V              | x1.42  | 9       | 1.18-1.68   |                |
